

## FLANGE FITTINGS

Tcomp has its own design and production of flange fittings for the assembly of preinsulated district heating pipes.

Flange fittings from Tcomp are offered in various designs in the dimensions Ø90 – Ø315 mm.

- Bends
- Sleeves
- Briansleeves
- Reductions
- T-sleeves with long or short branch

Flange fittings from Tcomp are manufactured in stainless acid-resistant steel AISI 316 L, corresponding to EN 1.4404 in 3 mm material thickness.

Flange fittings are delivered with plugs, bolts, washers and nuts in hot-dip galvanized steel.

The combination of galvanized bolts and nuts, as well as the stainless acid-resistant quality of the flange product, has been chosen to optimize strength and durability.

## Examples

*Briansleeves – from single pipe to twin pipe*

## Advantages

The advantages of flange fittings in stainless acid-resistant steel from Tcomp are many, including:

- ✓ Long life
- ✓ Short production time and fast delivery
- ✓ Favorable prices
- ✓ Easy and quick installation
- ✓ The product can be shortened on the construction site
- ✓ No coating and no anode
- ✓ The product does not take up much space
